**MODEL NUMBERS**  
**172      172-Q**  
**Ledgeback Faucet**

Flow Rate = 2.2 GPM @ 60 PSI  
ADA Compliant and Meets ASME 112.18  
ANSI/NSF61/Section 9

## **172** Compression Valves

## **172-Q** 1/4 Turn Valves

The 8-inch center Slantback faucet has a cast brass body. The stems are made with an all brass construction, and they use either a ceramic disk, or rubber seat washer for sealing. The handles are zinc die cast with a chrome plated finish. The 2.5 inch spout is chrome plated cast brass with a water saving flow restrictor. The supply connections are fitted for 1/2-inch NPSM threads. The spout connections are fitted with 3/8 copper tubes that seal at the end with compression fittings. The length of these tubes can be adjusted from 4" to 8" centers for the hot and cold valves.
